

General Information

SH: Likes how there are information about bus fare and common route to popular attractions.

S: Thinks the solo-traveling friendly info is very important. Especially for women.

R: Really like weather because check it website

F: The general information about safety, and the weather is useful.

A: "I think for the weather widget, it should show weather for the coming days or weeks under the main temp instead of weather for the next few hours."

S: "I really like how the destination screen has a summary of the general information!"

Y: i had a longest time finding the transportation page i think it's because there's no affordance on the button...

Login

T: "The search bar is the weirdest didn't would search signi"

A: Feels a bit incongruous to have a search bar on the login page.

Y: sign in page is great!

Service

C: Wants subtext in home page to know what kind of information or services he can get from website.

S: "It's not very clear how this company is making money.. I am assuming that they sell travel plans. I think it should be more obvious what services they are providing."

Others

F: Wants a customer reviews section.

A: Filter events by months not specific dates.

F: "I really like social media, and I think having some kind of instagram feature will definitely want me to check out the places on the app more!"

SH: Navigation was easy and straight forward.

Y: where are you traveling from seems like an important question but it's again quite hidden and in the middle of the page so i feel like the placement could be more obvious
